Subject: NY Rad Sites: NYS DOH

Hi Dan:

I first heard about sites in NY State from NYC DOH representatives when I first started working at the Wolff Alport Radiological Site in Brooklyn in 2012. Then when we were on a video phone conference with EPA representatives, NYC DOH, NYS DOH and NYS DEC, Adela Salame-Alfie mentioned the same thing. Her info is below. She mentioned that other sites in NYS existed that exhibited "worse" radiological issues than Wolff Alport. From there I requested my management to pursue the locations. After my manager pressed we received four sites. The three sites in Niagara County (NFB, HTC and 738 UMR) and one in Mount Kisco, NY called Canadian Radium & Uranium (CRU). My program (EPA Region 02 Removal Program) only received three of those sites (NFB, HTC & CRU) to perform removal assessment on. Since then, I have been requested to perform a removal assessment on 738 UMR. So in the end, all four referrals have at least made it to the EPA removal assessment phase.

Adela Salame-Alfie (Director of Radiological Health) (518) 402-7510
asa01@health.state.ny.us

Merry Christmas and Happy Holidays if I don't hear from you.

Subject: Nys health dept name

Eric, can you get me the full name of the woman who worked with nys health dept who raised these properties in NF during a conference call? Since she left the state health dept, it would be great to pick her brain about what prompted her concerns. I'd love to find her to talk.
Thanks
